Because Families come first!

Getting Started

# About Us

---

- Safe Family Cards Aust are committed to promoting Family Safety, Health and Wellbeing.
- We have alliances with ABC Learning Centres and Family Day Care Aust to provide Safe Kids Cards to their parents.
- With the help of In Safe Hands – Educators in Safety, we strive to present community safety seminars to all family groups.
- LifePrint – DNA system for recording DNA on cards. DNA is the ultimate form of identification when needed.
- Free Online Information for family health and safety showing our commitment to family wellbeing.

- Product training – provided.
- Business cards – artwork supplied
- Point of Sale – artwork supplied
- Order pads – provided.
- Website Login.
- ‘Working with Children’ Blue Card – ChildCare/Schools.

# Internet Connections

---

Most of the applications for cards will be online. It is important that you understand the process for this. Ideally you would have a Laptop and Mobile Broadband, however a home computer is OK.

Applications from schools, childcare centres and aged care homes will be entered on the premises, therefore it is important that your connection is able to download information without 'dropping out'. Some places will allow you to 'login' to their wireless broadband, this will give you a faster connection.

You may already have a mobile phone and laptop, if not there are many 'deals' around – one worth checking out is [www.dodo.com.au](http://www.dodo.com.au) – combined mobile phone, laptop and mobile connection. Remember that you will also need home internet connection as well because the mobile connections are an expensive, slower alternative for home use.

# Your Camera

---

- Most families will have a digital camera to use for the purpose of taking 'passport' type photos. 3 Mega Pixels min.
- Recent mobile phones also have a camera suitable for taking these photos, it is fine to use them. Ensure you have the download active on your computer to accept the photos and store them in a folder.
- Important – ensure your camera is fully charged.
- The application process needs a photo downloaded before it is confirmed.
- The photo is for Identification purposes and therefore you need to ensure it is a good, clear head & shoulders shot.
- You can receive photos via email, store and use as directed. These must be good quality and the correct size.

## **Access Login - Application**

---

- <https://safefamilycards.fastcards.com.au/index.php/pages/home/>
- Link to the secure application site.
- You will receive a username & password.
